

DULON STAINLESS STEEL POLISH 60

CLEAN- SHINE- PROTECT

DESCRIPTION

Professional cleaner & protector for all kinds of (polished) stainless steel like bollards, handrails, hinges, air scoops, catches, locks, latches, port-holes etc. It removes contamination, corrosion and provides a layer of protection.

- Removes scale, lime deposits, corrosion, and other contaminants.
- Deep lustre.
- Long-lasting protective function.
- Easy-on easy-off.

INSTRUCTIONS - MANUALLY

1. Apply DULON STAINLESS STEEL POLISH 60 a damp microfibre cloth, polish pad or sponge by circular motions, until the desired result is achieved.
2. Let it dry and rub / buff with a clean, dry microfibre cloth or lambswool pad.

INSTRUCTIONS – MACHINE (concentric + medium polishing pad and lambswool pad)

1. Lightly moisten the polishing pad (medium) and apply a small amount on the pad.
2. Spread DULON STAINLESS STEEL POLISH 60 thinly on the surface.
3. Polish the surface at low speed, in gentle, controlled movements - horizontally and vertically.
4. Increase rotation speed slightly during polishing process until desired result is achieved.
5. Buff / rub with a clean, dry lambswool pad at high rotation speed.
